

Field Engineer

For a utility design-build construction company
In Benicia, California

Job Description

Are you self-motivated, energetic and looking for an opportunity in the construction and project management fields? Do you want to further develop your skill and experience in team leadership and project delivery? Join our team and experience all that Accu-Bore Directional Drilling, Inc. has to offer!

This is an exciting time to join our team. We're growing at a fast pace and able to provide ample opportunity for challenging projects and career development. We have earned our reputation as a leading provider of design, procurement and construction services for the underground utility industry and pride ourselves on our company culture, which emphasizes collaboration and an enthusiasm to solve our customers' most challenging problems.

The **Field Engineer** receives daily leadership support from Program Managers under the Director of Field Operations, and is responsible for a variety of field-based project management tasks. These positions are well suited for recent college graduates with degrees in engineering or construction management and a future interest in a project management position. The successful candidate will be open to travel throughout California to support our field operations. We place an emphasis on candidates with strong interpersonal and communication skills.

Responsibilities

- Provide Project Manager with insight to project risks and mitigation strategies; must be able to problem solve.
- Ensure timely, accurate and consistent communication between field teams and office-based staff.
- Be the on-site customer point of contact, providing customer-facing support for field crews.
- Redline project drawings as necessary.
- Provide quality control of project documentation.
- Prepare reports for clients.
- Monitor quality control schedule and provide cost data as requested.

- Assist crews with daily/weekly work planning including, but not limited to, preparation of weekly binders and performing site walks.
- Ensure crews have accurate safety and quality documentation on site.
- Ensure project closeout punch list items are completed in a timely fashion

Qualifications

- 2+ years of field engineering, construction management, or similar experience
- Clear Driving Record
- Ability to communicate effectively in all formats
- Good at problem solving
- Organized
- Cool under pressure

Desired Background

- Construction industry experience, including redlining drawings, preparing RFIs, change orders and submittals
- Bachelor Degree (or higher) in civil, electrical or mechanical engineering
- Familiar with Underground Service Alert (USA)
